

## JAMES KAY

- **Role: Chief Operating Officer (COO)**
- **Location: London**
- **Date joined eWater: 2021, but I also worked with eWATER previously in 2015**
- **What eWater means to me:**  
“Sustainability is the key that so few have managed to solve. We’re the real-world solution to the water crisis across Africa, and the only ones who have proved we can keep the water flowing 24/7. For me, it’s the eWATER teams in each country that are critical. Their technical ability and passion for providing sustainable water to local communities is what drives us forwards.”
